Locals and Personals

Get your cutters' and pitters' cards at the Press office.

T. L. Mendel is now driving a Chalmers touring car recently purchased.

Miss Catherine Cooper went to Berkeley Monday to re-enter U of C.

Mrs. Stanley Smith entertained a number of her former school friends at her home last week.

Mrs. Henry Campbell and Bertha Kelly went to Capitola Thursday morning to enjoy an outing.

Mrs. E. R. Kennedy and Miss Ruth Lloyd went to Mt. Hermon Monday to spend the week resorting.

Irwin Henry, who has spent the summer in Los Angeles with his uncle returned to Campbell Sunday.

Mr. and Mrs. Calvin Bohnett will leave Sunday for an outing at Lake Tahoe, making the trip by auto.

Theo. Beardsley arrived home Monday from the south where he has been spending some time with his sister.

Mr. and Mrs. J. E. Peterson and son, of Stockholm, Sweden, are house guests at the John Brynteson home this week.

Misses Helen Baugh and Ruth Hayes will go to Oakland Saturday to begin their duties in the city schools Monday.

Men's dress and work shoes, Boy's shoes, Men's socks, Rubber Boots, shoe Polish and laces.

E. E. SOWER.

Mr. John Brynteson has received his new Pierce-Arrow touring car which he recently purchased thru a Minneapolis agency.

Mrs. Ivy Frost has resigned her position in the office of the California Canneries Co., and is again on duty at the local telephone office.

Mr. and Mrs. Ralph Hyde and son, and Mr. and Mrs. Ernest Barron and children will go to Seabright Sunday, the ladies and little tots remaining for a week.

Dr. Emily Wells sailed for Honolulu Tuesday after spending her summer vacation here with her cousin, Dr. Cooper, and visiting in other parts of the state.

Dr. and Mrs. W. I. Merrill and children motored to Watsonville Sunday for a visit with Mrs. Merrill's brother, Mr. Ralph Cookson, who is in the S. P. office at that point.

Mrs. R. E. Dunphy will go to Vallejo Saturday to visit her son, Robert, and Mrs. and Miss Sykes. She will be gone about two weeks visiting also with Nicholas and Harriet.

Mrs. Dwight Van Arsdale and son, Richard, arrived from Hollister Sunday to spend a week (or until Dwight needs the cook again) with her mother, Mrs. Ethel Davis, and family.

Mrs. J. H. Isham came down from San Francisco yesterday to spend some time here with her husband, who is employed this summer at the Hyde Packing Plant, and with her sister, Mrs. Minnie Lewis.

Mrs. Ellen R. Smith has received word that her daughter, Miss Dorothea, who has been in the "Y" service in France, left New York Wednesday for home and will probably be here early next week.

Mr. and Mrs. Robt. Glover and son, Richard, left Monday by auto on their return trip to Santa Barbara. They will spend a week at Los Angeles and coast points before arriving home where they will resume their duties in the city schools.

Miss Anna Hagelin entertained at her home on Santa Clara road last week a party of twenty-five young people in honor of Miss Ruth and Mr. Kermit Brynteson. The evening was spent in games and social visiting. Light refreshments were served.

The Epworth Leaguers, twenty strong, attended the County Alliance Rally Tuesday night. The trip was made by auto truck to the Machada School house in Paradise Valley. There was a picnic supper preceding the meeting but the local contingent did not figure in that. However they did capture the banner for the best record for the quarter just ended.

Mrs. I. P. Beal, the incoming president of the Home and School Club, and Mrs. C. W. Toles, retiring president, attended a meeting of the District Congress of Mothers last week at the home of the president, Mrs. Harry Ewing. The principal object of the meeting was a round table on Americanization, the new department of the Parent-Teacher organizations.

Mr. and Mrs. Herb. Wade came down from Oakland last week for a ten day stay with Mrs. M. Wade. This is the first time Herb. has been able to get here since January 1918 when he was badly hurt while at work. Most of the past 18 months he has spent in the hospital having had to go back the third time for treatment for several months each time. He is still using crutches but is glad to be able to be about.

Misses Isham Married

Two weddings in which Campbell claims an interest occurred in San Francisco Wednesday. In the forenoon that day Clare O. Bryant and Virginia V. Isham were married and left for a visit to Yosemite. Clare is in the employ of the Standard Oil Co. at Richmond, where they will reside upon their return.

In the evening Dixie L. Isham was wedded to Waldron G. Drew and they are passing their honeymoon in the Russian River Country. Mr. Drew is book-keeper and stenographer in the San Francisco offices of the Oregon Power Co., and Mr. and Mrs. Drew will continue to make their home in that city, for a time at least.

The first ceremony was a church wedding, with only the families present and the second was performed in Oakland at the home of the minister, an uncle of the groom.

As three of these contracting parties were former Campbell residents and popular young people, a wide circle of friends here extend congratulations and good wishes.

Easy Life of a Modern Business Man Nowadays

The following is an excerpt from a letter sent by a representative business man, an owner of a plant, to the United States revenue collector:

"I have been held up, held down, sand-bagged, walked on, sat on, flattened out and squeezed, first by the United States government for the federal war tax, the excess profits tax, the liberty loan bonds, for the state, county and city highway tax, the auto tax and syntax, and by every society and organization that inventive mind of man can invent to extract what you may or may not possess; from the Society of John the Baptist, the G. A. R., the Woman's Relief, the Man's Relief, the Stomach Relief, the Navy League, the League of Nations, the Red Cross, the Iron Cross, the Double Cross, and every other cross of all colors, until I feel that I am a cross myself—and by the Y. M. C. A., the Y. W. C. A., the Old Folks' Home, the Children's Home, the Dorcas society and every hospital in town.

"The government has so governed my business that I do not know who owns it. I am inspected, suspected, examined and re-examined, informed, required and commanded, so I don't know who I am, where I am, or why I am here.

"All I know is that I am supposed to be an inexhaustible supply of money for every human need, desire or hope of the human race and because I will not sell all I have and go out and beg, borrow or steal money to give away, I have been cussed, discussed, boycotted, talked to, talked about, lied to, lied about, held up, robbed, and nearly ruined, and the only reason I am clinging to life is to see what in h— is coming next."

Lectures for Mothers

Campbell is not to be slighted in the Mother-craft Work this year for Miss Ray Bromley has announced that she will give a course of lectures to mothers sometime in the latter part of October. Her lectures will include many helpful ideas and suggestions taking up in detail the various points of character to be impressed on the child's mind. How shall one deal with such difficulties as falsehood, fighting and mischief? What is the correct interpretation of obedience? Shall the study of nature be taken up at home or left to the schools?

Miss Bromley, of San Francisco, has made a deep study of this subject and beside her theoretical work has actually applied her theories. Mothers who are really interested in their "Business of Mothering" will make an earnest effort to be present.

Notice to Growers and Pickers

If orchardists in need of prune pickers and those desiring work will notify the Press office we will be glad to act as a go-between. There are often several inquiries a day which might thus be satisfactorily filled.

Carillon.

This is the name given to a set of bells arranged in such a way as to be capable of giving forth a regular tune, or melody. A much greater number of bells is required for a Carillon than is hung for a general peal of bells. A large peal of bells consists of 10 or 12, while a Carillon may consist of as many as 30 or 40.

Optimistic Thought.

To expose an ambassador to abuse it is only necessary to send him away without an answer.

News of Canned Peas

Because the 1919 pack of canned peas was very short, only about one-half of the normal requirements of the consuming trade, we have been obliged to comb the market pretty thoroughly in order to find enough of this popular canned vegetable for our customers. For this reason our patrons will see several new labels, and have a choice of three grades.

Prices and brands are as follows:—

To sell at 20c: Fruitvale, Pacific, and Yacht Club brands. All staple quality.

To sell at 25c: Del Monte Special Extras. These are one grade better than the staple Del Monte brand, and should be very popular.

To sell at 30c: Del Monte Petit Pois (so-called French peas). These are very small, a very fancy sort, of which we have but a limited stock.

All of these are splendid values at the prices quoted.

HINTS FOR THE POULTRY GROWER

Cholera and blackhead, a common disease of which many kinds of domestic poultry die, but most commonly chickens and turkeys, has no real name in poultry annals, though on making a diagnosis of the dead birds often it is called cholera, blackhead and a few other names, when, after all, it is merely acute inflammation of the intestines caused by feeding constipating food, says one person.

It is true that fowls after eating drastic poisons, will show up with the same intestinal inflammation, but it is more commonly due to feeding a too-heavily concentrated ration. It is the mysterious disease that so often kills hogs, calves and sheep. In the first it is, as in poultry, too often attributed to cholera, and the owner goes on feeding in the old way instead of giving the flock, or the herd, plenty of pure water at all hours to quickly pass the concentrated food on to quick elimination, helped on by regular doses of Epsom salts.

This neglect is more apparent with poultry than other stock. Corn is one of the feeds most sure to bring on this condition, if fed in large quantities to any kind of stock. With poultry, as with other stock, and especially in spring when frost lies on the new grass the trouble at times will bring about great loss.

Dawn as It Is Welcomed by Animals, Birds of the Air and Posies of the Field

The dawn that dispels sleep, in nature is only welcome. The cows that have drowsed since evening twilight, crouched in ungainly comfort on the ground, like half-produced sphinxes to the night-wanderer's vague vision, with now and then a moment's munching of the cud in their dreams, wake at the first gray tints, upheave their clumsy bodies, and fall to browsing daintily near the pasture bars.

The birds stir in the high boughs and the bushes, call and twitter to each other, preen their ruffled feathers and shake slumber from their joyous throats in song.

The fragrances of herb and flower, the rose's charm and the balsam of the firs, exhale upon the dewy air. The east's perpetual miracle, coursing the globe forever from its source in the mid-Pacific waters, is at the verge of revelation. The riddle of the night's dream opens its mystery as the lighter tints are absorbed into the splendid heraldry of morn. Earth with a rich expectancy awaits the new revelation—always at hand, ever withdrawn, going on with the dawn to new days.—Charles Goodrich Whiting.

ROMANCE

I found a gypsy in our wood,
With limbs around—a skinny brood
Of partridges on edge to slink.
Her hair ran over her like ink.
She has a silver samovar
(They must have robbed a Russian bar.)

And sat beside it on the grass,
Stirring her tea-brew in a glass
With peeled white stick instead of spoon.

She looked the princess-in-the-moon;
Three strings of moons below her throat

All shining, yellow gold (I think!)
Red handkerchief, and petticoat
Light purple, and her bodice pink.
A fairy-tale—when would it fade?
Next minute! "Lady won't you trade?"

I got a handsome little "can!"
The scamp—his canting gypsy tone
Fastened like leeches on my ear,
"No thanks! I live a ways up here,
Come and buy bread. Your boys look thin."

My princess paid me with a grin.
—Dorothy Leonard in New York Times.

THE CATBIRD

Let others sing the robin,
And thrush whose magic flute
Among the bowery branches
Holds every listener mute.
I praise the scrappy catbird
Whose neat and sober coat
Belies the rowdy noises

That issue from his throat.
But while the sweeter minstrels
Are feasting with delight
On strawberries and cherries,
As is their ancient right,
The catbird every morning
Is busy on his round
Of orchards where his harvest
Of bugs and grubs is found.
No tiny insect snugly
In leaf or cocoon rolled,
No worm that plans a campaign
On fruits of mellow gold,
No microscopic larva
Escapes his beady eye;
All honor to the catbird
Despite his raucous cry.

—Minan Irving in New York Sun.

He (somewhat embarrassed after the car had stopped on a lonely road)—
"I can't start my engine; the thing won't spark."
She—Must be like some people I know.—The Olive Branch.

The Army Worm and Its Control

How to Dispose of Pest Which Swoops Down on All Green Crops

The army worm that has been doing so much damage to corn, wheat and green crops in various sections of the country, is the caterpillar form of a moth that flies only at night, according to Frank B. Wade, deputy entomologist for the Indiana state conservation commission. In a bulletin issued by the commission, Mr. Wade describes the family history of the pest and tells the most approved methods of fighting it.

"To begin with," said Mr. Wade, "the moth is about one and one-half inches across the spread wings and is brownish gray in color. The caterpillar, when full grown, is about one and one-half inches long, is smooth, and is usually greenish in general color with one broad stripe of dark gray or black down the middle of the back and with a narrower stripe of the same color on either side. The broad stripe usually has a fine light broken stripe running down its center. The head is greenish-brown, speckled with black.

"It is this caterpillar form that does the damage by eating every green thing within reach. So numerous do they sometimes become that one can actually hear them eat in concert. When they have cleaned up on the food supply in one field they move en masse to an adjoining field, and thus comes about the familiar name of army worm.

"The full grown caterpillar ceases to feed and goes into the pupa or resting state after from three to four weeks of feeding. Here it remains beneath the surface of the soil, as a rule, for about two weeks. The pupae look something like date seeds. The moth on emerging from the pupal case dries its wings and flies away to mate. The eggs are then laid usually in the folded part of grass blades, and they hatch in from eight to ten days, thus starting the tiny caterpillars once more.

"To control these pests one should be alert to detect the first attack, for the area invaded is usually relatively small at first and may be mowed off and straw scattered and burned, thus destroying the caterpillars. Another method of control is to spray the infested area heavily with paris green (one pound to 50 gallons of water) or with lead arsenate (two pounds to 50 gallons). Such sprayed material should, of course, not be used as feed.

"Poisoned bait will also do good service. Make up a bran mash with 50 pounds of wheat bran and one pound of paris green or two pounds of lead arsenate and moisten it with cheap molasses or sirup and add the juice of half a dozen lemons or oranges. By scattering this bait broadcast throughout the infested area in small pieces, a large number of worms may be killed.

"To keep the worms from moving on to new feeding grounds, trenches should be plowed entirely around the infested area. The trench should be at least six inches deep and should have a vertical side toward the new ground. It should have postholes at intervals for the worms to fall into and it should be kept as dusty as possible by dragging a log through it to pulverize the soil. It should be tended at all times when the worms are on the move, as they should be burned when they begin to get numerous in the trench. A gasoline torch or straw covered with coal oil may be used for this purpose.

"In wet weather the trench will not stop the worms, and then a line of heavy road oil laid an inch or two wide on a smooth hard surface should be used. Drag a plank heavily loaded with stones over the ground to prepare the surface for the oil.

"The army worm appears about the same time each year, but in small numbers and without doing noticeable damage. It is only when, because of circumstances which are not thoroughly understood, the army worm becomes very numerous, that it is a menace. Probably some of its natural enemies fared ill last winter and were not on hand in their usual numbers to dispose of the worms this spring. At any rate they are with us, and if not properly handled they bid fair to do more damage in the localities where they appear than the seventeen-year locust."

KEEPING CHICKENS IN TOWN

In many towns and cities there are ordinances restricting the keeping of fowls under certain conditions, namely, that the neighbors shall not be annoyed by the crowing of the male birds and that the poultry house must be located a specified distance from any dwelling. Under such conditions, says the United States department of agriculture, a permit should be easy to obtain and the conditions set forth complied with.

The male bird in the flock is not necessary for the production of eggs and usually the house can be so located and kept clean that it will not annoy the neighbors.

Indian Talk Was Too Much For Fritz When He Tried to Tap the Yankee Wires

There was one code Fritz never got on to in France. That was the Slout. A soldier just back from France tells of it:

"A good many German spies got over into the allied lines," said the Yank, who was in charge of a communicating battery. "And there was some tapping of lines and listening in by German agents who understood English perfectly. We got around that in a clever way. We put Slout Indians on the telephones to send and receive orders.

"Ump, glum, hoosha, moo, chunk," an Indian would repeat over the telephone, meaning 'bring up a battery of 75's.'

"Og, gog, pom, began, cachoo, rak-ak," would come the answer, which might mean, 'they're starting, will be there in five minutes.'

"I don't know how much of a technical war vocabulary those Slouts had, but Fritz never got wise to the lingo."

How Light Changes Shape of Pupil of Eye of Both Animal and the Human

Nothing is more deceptive than the appearance of a cat's eye. The pupil ordinarily appears as a long, narrow oval or a vertical black line, yet its natural shape is circular. It is a matter of the effect of light. In a bright light our pupils become very small circles, while those of a cat turn into ovals or narrow slits. The general effect is the same in either case—namely, to diminish the quantity of light passing into the eye. Curiously enough, in the larger animals of the cat tribe, such as tigers, the pupil sometimes behaves exactly like a human pupil, and when brightly illuminated contracts into a minute circle instead of becoming linear. In the case of domestic cats, the older the animal the more frequently does the pupil of the eye assume a circular form.

Famous White Sox Second Baseman in His Old Form Both at Bat and Afield

Age is no handicap to Eddie Collins, famous second baseman of the Chicago White Sox. At least the Tarrytown lad has betrayed no sign of decay thus far in the season's campaign, and in the series at the Polo grounds has flashed all his old form at the bat and afield. Collins and Schalk are the

Eddie Collins.

backbone of the Sox, the mainspring by which the play of the club afield is directed.

Collins certainly is as fast as he has been through the last few seasons, and although he has not invaded the .300 circle in batting he is sure to arrive up there in the early future. Furthermore, Collins has more to do with infusing a spirit of co-operative combativeness into the Sox than any other individual in the outfit, with the exception of Kid Gleason, the manager, who is a fighter down to the ground and one of the best all around good fellows in the pastime.

POPULAR SCIENCE

The normal number of teeth is 32.

The number of bones in the body is 240.

The weight of your blood is 28 pounds.

A skeleton weighs about 14 pounds.

The human brain is twice as large as that of any animal.

Tobacco leaves treated with the X-ray are thereby cleared of the destructive beetle.

BOY SCOUTS

FATHER AND SON CAMP TRIP

A scoutmaster found that his position at the head of a troop took a certain amount of leadership away from the father, and so when a scout suggested a father-and-son overnight hike he put one across. He says:

"The troop left at noon. An auto carried the fathers' blankets and one carried food supplies. Father and son hiked side by side three miles to our camp. The evening meal was prepared by the scouts whose fathers could not come. Fathers were not bothered by details or required to take active part in our program (except camp-fire), but watched closely the scoutmaster's decisions, how he handled the swimming proposition, how cooking details worked, how he kept the boys busy, and each particularly his own son.

"Father and son slept side by side, the son making the camp bed. This guardianship by the father alone in the woods by night was much bigger than simply sending the boy to bed, as at home.

"Every father took part around the camp-fire, and how they did make their sons' eyes pop open with either stories or experiences from their own lives. We served a camp-fire lunch of gridle cakes and hot chocolate. There was individual cooking in the morning, the son cooking his father's breakfast.

"As a result the fathers are planning another get-together outing."

A SCOUT FIRST-AID JOB.

He is on Hand When an Accident Happens and With the Right Help.

TO SPECIFY SCOUT UNIFORM.

The war department has agreed to detail an officer in the near future to the Boy Scouts of America to co-operate in deciding details in the matter of uniforms.

There are many returned army officers and men taking up the request of the war department to act as scoutmasters for the troops of boys. Some of these have merely changed the buttons on their uniforms.

The national headquarters of the Boy Scouts of America through the chief scout executive, James E. West, makes this announcement in regard to scoutmasters' uniforms:

"We doubt very much the advisability of favoring as a permanent policy converting army officers' uniforms into scoutmasters' uniforms. Those who have had army experience are entitled to use these uniforms for a limited period at least."

WHAT SCOUTING IS WORTH.

Some scouts drive quite a few miles to attend troop meetings.

Scoutmaster H. H. Kurtz of Troop No. 1 of Locustdale, Pa., says:

"Only three Locustdale scouts live within a mile of their headquarters. Many of them live from seven to nine miles away, and they come on wheels or on horseback or in automobiles or they walk.

"At every meeting there are scouts who, having come by train, must, owing to poor service, walk back nine miles, and sometimes these boys walk both ways.

"One patrol leader, in the terrible days of early 1918, walked five miles to the meeting through a sleet storm that was prostrating telegraph poles."

COLLEGE MEN LEAD SCOUTS.

Scouting has aroused considerable interest at Yale. Thirty-five undergraduates are now scoutmasters and assistant scoutmasters of troops in New Haven, Conn.

SCOUTS WELCOME SOLDIERS.

Boy scouts of Los Angeles, Cal., held up for a day in their milk bottle drive to take part in the "Welcome Home" celebration given to their big brothers just back from "over there."

ROAD BUILDING

BENEFITS OF COUNTRY ROADS

Among Other Things They Cheapen Cost of Transportation of Farm Products to Market.

Good roads promote self-respect in a community. They make possible social intercourse. They bring the benefits of churches and schools within the reach of all. They help to keep the boys on the farm. They cheapen the cost of transportation of farm products to the markets and thus add to the farm profits. They add to the value of farm lands much more than they cost. They mark the degree of civilization of the rural community. This, in short, is the value of good roads as seen by the extension service of the University of Missouri College of Agriculture.

The building of good roads is of the greatest importance to a community. What kind of a road should be built? Of what should it be constructed?

Good Roads Like This Bring Farmer Nearer to City Markets.

What are the things to be considered in locating the road? What "grade" should be maintained? How should the road be drained? What are the laws governing highway construction? There are a few questions answered in extension circular 68 dealing with country roads.

Matters of prime consideration in locating a road are: Easy grades, good drainage, exposure to sunshine, elimination of culverts and bridges by avoiding unnecessary creek crossings, directness and the number of farms to be served for a given length of road. Whenever possible to avoid it, a good location should not be rejected merely because a certain roadway has been in use for some time. If the location of a used road is bad it should be changed if possible. In relocating roads avoid railroad crossings at grades.

The grade of the road is important for on this depends the weight of the load which can be hauled economically. By grade is meant the rise or fall in feet for each 100 feet in horizontal length of road, usually expressed in percentage. A 5 per cent grade means that the road rises or falls 5 feet each 100 feet along its center line. It has been calculated that on a smooth country road the load that one horse could pull on a level would require two on a 5 per cent grade, three on a 10 per cent grade and four on a 15 per cent grade. Engineers usually figure a 6 per cent grade as a maximum.

Road work in Missouri has not been as well managed as other public work. Projects have been too narrowly limited to localities, resulting in fragmentary effort. Skilled locating and supervision of construction have been generally lacking. The remedies are: First, a wider co-operation and the adoption of broad schemes of improvement, preferably with units no smaller than counties. Second, the absolute elimination of political considerations in the spending of money. Third, securing good engineering advice in the preparation of plans and requiring careful engineering supervision of construction.

ENGLAND SPENDS 50 MILLION

Grants to That Amount Will Be Distributed for Reconstruction of Roads and Bridges.

Grants amounting to \$50,000,000 will be distributed by the British road board for the reconstruction of roads and bridges in England in 1919. Demobilized army units will be used to do the labor. Local highway authorities will be required to match this appropriation by at least as large a program of road work as they carried out in the year before the war. Area taken into consideration, England's program is thus far in excess of that of the United States, including both federal aid and state funds.

POOR ROADS ARE EXPENSIVE

Congressional Report Places Annual Loss at \$504,000,000 for Transportation Alone.

The congressional report of 1914 placed the economic loss of the United States through poor roads at an annual figure of \$504,000,000 for transportation costs alone. The heavy increase in tonnage since that time probably makes the loss today close to \$1,000,000,000.

DAIRY

PRICES OF DAIRY PRODUCTS

Do Not Fully Respond Immediately to Advance in Cost of Feed—Lag Was Felt in 1917.

(Prepared by the United States Department of Agriculture.)

Higher prices of the crops eaten by live stock should find their way into higher prices for live stock products. Eventually they may, but there is what the bureau of crop estimates of the United States department of agriculture calls a "lag." Product prices do not fully respond at once to advance in feed prices. Such was the situation of farmers with regard to the prices of dairy products and other animal products from 1915 to 1918, and the lag was heavily felt by farmers in 1917.

From 1915 to 1916 crop prices increased 47 per cent, and from 1915 to 1918 about 120 per cent. During the same time the total value of animal products on the farm did not correspondingly gain, although a tendency to overtake the lag appeared in 1918.

In the meantime live stock has increased in number and price, and enormously in total value, although not enough to hold its place in the procession, and it is interesting to compare the total value of live stock products with the total value of live stock itself year by year during the war. In each of the three years, 1913-1915, the aggregate value of live stock products was 65 per cent of the aggregate value of live stock. The ratio went up to 68 per cent in 1916, made a great advance to 78 per cent in 1917, and 84 per cent in 1918. Live stock value, compounded of increasing number and increasing price, lagged behind the advancing value of live stock products.

That there should have been a lag in the advance of live stock value, compared with the advance in the value of live stock products, is in accordance with experience, but these products themselves lagged in price behind the price of the crops eaten in their production. Consequently some unprofitable production of animal products may have accompanied the lag of live stock value behind value of products.

Good Pasture Is the Cow's Best Feed.

cordance with experience, but these products themselves lagged in price behind the price of the crops eaten in their production. Consequently some unprofitable production of animal products may have accompanied the lag of live stock value behind value of products.

TO AVOID MOTTLED BUTTER

Defect Is One of Workmanship and Can Be Prevented by Application of Proper Methods.

(Prepared by the United States Department of Agriculture.)

Mottled butter is frequently found on the market at this time of the year, and, even though it may be of very good flavor, it is strongly discriminated against by the purchaser. As this defect is one of workmanship, it can be overcome by the application of proper methods on the part of the buttermaker.

Mottles are caused primarily by an uneven distribution of salt in the butter. This may be produced by insufficient working of the butter or by churning, washing, and working it at a very low temperature, or by washing or working it at a temperature several degrees higher or lower than the churning temperature.

When the quantity of butter made in one churning is much less than usual, it is necessary to work it a greater number of revolutions of the churn than usual in order to produce the same results on the butter.

Extremely low temperatures of churning, washing, and working should be avoided, because they produce so firm a butter that it is only with great difficulty that the salt can be worked uniformly into it. High temperatures of churning, washing, and working must also be avoided to prevent an abnormal loss of fat in the buttermilk and also the making of a greasy, leaky butter.

Great variations in temperature during the manufacturing process should always be avoided. Under normal conditions the temperature of the wash water should be the same as, or within 2 degrees of, that of the buttermilk.

THE SEEKIN' THUNDER
Somebody's hidin' from the Lord, I know—
Thunder's a-shakin' the old world so!
An' I'm free to tell you that his chance is slim.
For lightnin's lookin' high and low fer him!

O the sun's blowed out,
An' you couldn't find a star;
An' I listen to the thunder
Sayin', "Come—out—o'—thar!"
The lock's shook loose,
An' he'll break the bar—
Shake the hills to pieces!
Better come out o' thar!

O what have you done, an' whar did you run?
The sky's mighty mad when it shuts up the sun
An' flings down the thunder that's for all day long!
I'm tellin' you, believers, thar's been somethin' goin' wrong!

You may pray fer the sun,
You may weep fer the star,
But you won't see daylight
Till you come out o' thar!
Don't you hear that thunder?—
"Break the lock an' bar!"
An' Lord help the sinner
When he comes out o' thar!"

—Frank L. Stanton in Atlanta Constitution.

"Damaged Goods"
Johnny was at the grocery store.
"I hear you have a little sister at your house," said the grocer.
"Yes, sir," said Johnny.
"Do you like that?" was queried.
"I wish it was a boy," said Johnny.
"So I could play marbles with him and baseball."
"Well," said the storekeeper, "why don't you exchange your little sister for a boy?"
Johnny reflected for a minute, then he said, rather sorrowfully:
"We can't now; it's too late. We've used her four weeks."—Philadelphia Ledger.

Scientists Assert That Brown-Eyed Men Are Far in Lead as Bigamists

Eminent doctors, scientists and criminologists say that brown-eyed men are dangerous. They have estimated that more than 75 per cent of the world's bigamists have brown eyes, and in explanation say that it is due to the fact that brown-eyed men generally have a dash of Southern blood in their veins. They are more passionate, have stronger and deeper emotions and consequently are more fascinating to women.
Eyebrows that droop and eyes that are close together are found among the worst rogues on the calendars, says one detective. Those who have made a study of characteristics also tell us that the snub-nosed man and the man who yanks his mustache down and the man with steel-blue eyes are selfish and melancholy, and have no steadfastness in their make-up. Out of 24 murderers, specially selected for the brutality of their crimes, no fewer than 15 have steel-blue eyes.

WISE AND OTHERWISE
The trouble with spending all your energy now is that there's no way to borrow any after yours is all gone.
Many a man is liberal with advice, but stingy with assistance. Silence may be golden, but notwithstanding that every now and then a creditor writes that he would like to hear from you.
It's a wise father who lets his own child know him.

Heat's Effect on Tuberculosis.
James B. Murphy and Ernest Strum (Journal of Experimental Medicine) subjected mice to heat, and a week later inoculated them with a strain of tuberculosis virulent for mice. These animals displayed a greater resistance than normal.

Report True
First Woman—I've been told that every time she calls at her husband's office he is out.
Second Woman—I'll warrant he is—out \$10, at least.
"No more the genial popping of the champagne cork."
"A tangible sign of wealth."
"Just so. But we can still have the melodious detonation of the exploding automobile tire."—Cleveland Leader.

Auto Truck Service
Would like to hear from HAULING and TRANSPORTING CONTRACTS. Have 50 Trucks available, any make or model—fit to handle any kind of work. PRICE RIGHT. Estimation given anywhere.

A NERVOUS BREAKDOWN

Miss Kelly Tells How Lydia E. Pinkham's Vegetable Compound Restored Her Health

Newark, N. J.—"For about three years I suffered from nervous breakdown and got so weak I could hardly stand, and had headaches every day. I tried everything I could think of and was under a physician's care for two years. A girl friend had used Lydia E. Pinkham's Vegetable Compound and she told me about it. From the first day I took it I began to feel better and now I am well and able to do most any kind of work. I have been recommending the Compound ever since and give my permission to publish this letter."—Miss FLO KELLY, 476 So. 14th St., Newark, N. J.

The reason this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, was so successful in Miss Kelly's case was because it went to the root of her trouble, restored her to a normal healthy condition and as a result her nervousness disappeared.

STOP! CALOMEL IS QUICKSILVER

It's mercury! Attacks the bones, salivates and makes you sick.

There's no reason why a person should take sickening, salivating calomel when a few cents buys a large bottle of Dodson's Liver Tone—a perfect substitute for calomel.
It is a pleasant, vegetable liquid which will start your liver just as surely as calomel, but it doesn't make you sick and cannot salivate.
Children and grown folks can take Dodson's Liver Tone, because it is perfectly harmless.
Calomel is a dangerous drug. It is mercury and attacks your bones. Take a dose of nasty calomel today and you will feel weak, sick and nauseated tomorrow. Don't lose a day's work. Take a spoonful of Dodson's Liver Tone instead and you will wake up feeling great. No more biliousness, constipation, sluggishness, headache, coated tongue or sour stomach. Your druggist says if you don't find Dodson's Liver Tone acts better than horrible calomel your money is waiting for you.—Adv.

Pass the Salt
Two reporters were boasting of the speed of their shorthand writing.
"Whenever I am reporting a meeting on a warm evening, all the people try to get near to my table."
"Why?" asked the other.
"Because," said the penpusher, "my hand goes so fast that it creates a current of air like a fan."
"A mere nothing," said No. 2. "I always have to report on wet paper, or else the current of air caused by the movement of my hand would blow it away. Besides, the paper has to be wetted every few minutes, because the friction caused by the rapid movements of my arms would set fire to it in no time."—London Tit-Bits.

MURINE Resists, Refreshes, Soothes, Reels—Keep your Eyes Strong and Healthy. If they Tingle, Smart, Itch, or Burn, if Sore, Irritated, Inflamed or Granulated, use Murine often. Safe for Infant or Adult. At all Druggists. Write for Free Eye Book. Murine Eye Remedy Company, Chicago, U. S. A.

Couldn't Fool Him
The story comes from London that two negro soldiers were engaged in conversation when one remarked: "I see gwine ter git me a eucalyptus."
"A what?" queried the other.
"A eucalyptus—dat's a musical instrument, fool!"
"Go on, nigger!" was the retort.
"You can't kid me—dat's one of de books of de Bible."

Good Intentions
"Do you think Bacon wrote Shakespeare's works?"
"Why start that old controversy?"
"Sorry! Thought it might be a relief to get up a little argument about something besides the league of nations."

Cuticura for Sore Hands.
Soak hands on retiring in the hot suds of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes.—Adv.

Easily Done
"How did that fellow Jones ever get such a reputation as a wit?"
"Why, he's so malicious in everything he says, people are sure he must be witty."

Affluent Indifference
"They say Mrs. Jones is awful rich."
"She must be. She's in a position where she doesn't care whether the rent of her flat is raised or not."

Dawn as It Is Welcomed by Animals, Birds of the Air and Posies of the Field

The dawn that dispels sleep, in nature is only welcome. The cows that have drowsed since evening twilight, crouched in ungainly comfort on the ground, like half-produced sphinxes to the night-wanderer's vague vision, with now and then a moment's munching of the cud in their dreams, wake at the first gray tints, upheave their clumsy bodies, and fall to browsing daintily near the pasture bars.
The birds stir in the high boughs and the bushes, call and twitter to each other, preen their ruffled feathers and shake slumber from their joyous throats in song.
The fragrances of herb and flower, the rose's charm and the balsam of the firs, exhale upon the dewy air. The east's perpetual miracle, coursing the globe forever from its source in the mid-Pacific waters, is at the verge of revelation. The riddle of the night's dream opens its mystery as the lighter tints are absorbed into the splendid heraldry of morn. Earth with a rich expectancy awaits the new revelation—always at hand, ever withdrawn, going on with the dawn to new days.—Charles Goodrich Whiting.

Scientists Assert That Brown-Eyed Men Are Far in Lead as Bigamists

Eminent doctors, scientists and criminologists say that brown-eyed men are dangerous. They have estimated that more than 75 per cent of the world's bigamists have brown eyes, and in explanation say that it is due to the fact that brown-eyed men generally have a dash of Southern blood in their veins. They are more passionate, have stronger and deeper emotions and consequently are more fascinating to women.
Eyebrows that droop and eyes that are close together are found among the worst rogues on the calendars, says one detective. Those who have made a study of characteristics also tell us that the snub-nosed man and the man who yanks his mustache down and the man with steel-blue eyes are selfish and melancholy, and have no steadfastness in their make-up. Out of 24 murderers, specially selected for the brutality of their crimes, no fewer than 15 have steel-blue eyes.

Its Purport
"I am sure those were confidence men who just sent a wireless message. I wonder what it was."
"Much like the usual one, I judge; 'send on suckers.'"

The Method
"The authorities must have found out by telepathy the opinion of the public about the Government ownership of telephones and telegraphs."
"Yes; by return wire."

Sure! High Heels Cause Corns But Who Cares Now.

You reckless men and women who are pestered with corns and who have at least once a week invited an awful death from lockjaw or blood poison are now told by a Cincinnati authority to use a drug called freezone, which the moment a few drops are applied to any corn or callus the soreness is relieved and soon the entire corn or callus, root and all, lifts off with the fingers.
Freezone dries the moment it is applied, and simply shrivels the corn or callus without inflaming or even irritating the surrounding tissue or skin. A small bottle of freezone will cost very little at any of the drug stores, but will positively rid one's feet of every hard or soft corn or hardened callus. If your druggist hasn't any freezone he can get it at any wholesale drug house for you.—Adv.

YOU CAN GET ALONG WITHOUT THIS PAPER BUT WHY TRY?

In the Superior Court of the State of California, in and for the County of Santa Clara

In the Matter of the Estate of John W. Brown, Deceased. NOTICE

NOTICE is hereby given that, pursuant to an order of the Superior Court of the State of California, in and for the County of Santa Clara, made on the 14th day of June, A. D. 1918, in the matter of the estate of said John W. Brown, deceased, the undersigned, the administrator, with the Will annexed, of said estate of said deceased, will sell, at private sale, in one or more parcels, to the highest bidder, upon the terms and conditions hereinafter mentioned and subject to confirmation by said Superior Court, on or after the 23rd day of August, A. D. 1919, all of the right, title and interest and estate of said John W. Brown, Deceased, at the time of his death, which was and is the ownership in fee simple of the real property hereinafter described, and of the right, title and interest that the said estate has by operation of law, or otherwise, acquired, other than, or in addition to, that of said deceased, at the time of his death, of, in and to those certain lots, pieces or parcels of land, situate, lying and being in the Town of Campbell, County of Santa Clara, State of California, and particularly described as follows, to-wit:

Lots Four (4) and Five (5) in the J. H. Campbell Addition to the Town of Campbell, as shown and designated on the Map of said Addition of record in Book "K" of Maps, at Page 29, in the office of the County Recorder of Santa Clara County, State of California.

Terms and conditions of sale: Cash in Gold Coin of the United States, ten (10%) per cent, of purchase price to be paid at the time of sale, balance on confirmation of sale.

Said sale to be made subject to state and county taxes for the fiscal year 1919-20.

All bids or offers must be in writing and may be left at the office of Bohnett & Hill, 311-314 Bank of San Jose Building, San Jose, California; or the office of the County Clerk, San Jose, California; or may be delivered to said administrator, with the Will annexed, personally.

Dated this 4th day of August, 1919.
RALSTON ALISON,
Administrator, with the Will annexed, of the Estate of John W. Brown, Deceased.
Bohnett & Hill, Attorneys for said Administrator, with the Will annexed.

U S Sales Good

The local post-office reports a sale of the army surplus supplies amounting to \$290.24.

These purchases included the following items:

- 188 lbs. bacon
- 96 cans beans
- 48 " string beans
- 408 " corn
- 24 " baking powder
- 8-5 lb " "
- 264 " tomatoes
- 1 case hominy
- 1 " macaroni
- 5 sacks rice
- 12 cans syrup
- 144 " peas
- 24 " tomato soup
- 1 case graham crackers.

OUR NEIGHBORS

Alphabeta Smith says salmon are biting again in Monterey Bay. How badly, A. B.?

No the fleet will not pass in review at Campbell. Let the small coast towns enjoy that thunder if they get it.

Pacific Grove held another "flower show" yesterday, and take it from us or me, that she can show about the finest lot of posies ever seen when she sets her heart on't.

The Searchlight gives a slant on the Redding laundries: "When our shirts get back from the laundry, nowadays, we feel like singing George M. Cohan's great hit, 'She's a Grand Old Rag'."

Carmel Bay will soon boast a real live fisherman's club with a membership of some 200 members. Here's a chance for you yarn spinners to wax eloquent and meet your match. Real reel stories are at a high premium just now.

MICKIE SAYS

IF EVER'BODY KNEW HOW MANY OF THESE LIL' WANT ADS ARE MAKIN' GOOD, WE'D BE PRINTIN' MORE 'N WE DO. THEY AIN'T VERY BIG, BUT JIMMINY! SOME OF 'EM ATTRACT MORE ATTENTION THAN A MULE IN A TIN BARN

JOIN THE LEAGUE OF THE NATION

BOTH HOUSES OF CONGRESS handed President Wilson a direct thrust when they passed the daylight saving repeal over his veto. This surely shows that he does not control congress at this reading. Neither does he hold the senate's votes in his pocket on the peace treaty, for already there is compromise talk. Can it be that the big democratic ringmaster is losing control of his pets? It looks very much that way.

ALREADY there are murmurs of a break in the peace conference. Belgium and Holland are quarreling over a patch of land. If we join the league at the present status with whom will we throw in our lot? Better keep out of that mess. We might get in "Dutch".

ONE DAY in the near future the Pacific Armada will steam thru Golden Gate. After many changes of mind and date, Sec. Daniels has set September 1st. as that day. It will be a grand sight and one well worth seeing. Being Labor Day will make it doubly attractive.

CALIFORNIA is fast coming into her own. This year it will produce 16 million of the 30 million bushels of peaches grown in America. And the industry is growing here while falling off in other states.

Locals and Personals

Doors and windows for sale.

73 North Central Avenue.

For Sale: 1 girl's and 1 boy's bicycle. See Gordon Smith.

Frank Nelson is home from San Francisco for a few days.

For Sale--Account of leaving town will sell my small orchard cheap.

ALEXANDER, 148 Dillon ave.

Miss Phebe Farley will leave Tuesday for Thompson Falls, Montana, where she has a position in the city schools.

Mr. and Mrs. George Phelps and Miss Stella Leviston left today for a few days vacation which they will spend in the Big Basin.

Mrs. Darrell Papst and daughter, Ada, arrived recently from Sisson for an extended visit with her parents, Mr. and Mrs. W. R. Coupland. Mr. Papst who is at McCloud at present will come later.

Mrs. M. J. Wilson and Mrs. Onie Putnam are visiting in Keene where their son and brother is living. Mr. Wilson was very seriously injured a few years ago in an automobile accident and is in very poor health.

Mgr. Davison of the local association packing plant reports receipt of 100 tons of dried cots which is a big quantity for this early season. They are being shipped almost as fast as received. The first lot of prunes were delivered Wednesday which is also quite early.

Mr. and Mrs. F. David Duncan and sister, Miss Emily, returned home Sunday after a week's trip to Yosemite and Buck Meadows where they visited their sister, Mrs. Jas. Donohue. Mrs. Donohue accompanied the party to Yosemite. Mr. and Mrs. Duncan went back to Berkeley Monday.

The Geo. E. Hyde Co. cannery has just installed automatic peach cutting and pitting machines to facilitate handling their big pack. With the addition of these machines the capacity of the plant will be greatly increased as one operator can handle more fruit in a given time. This is the latest thing in improved machinery installed at this plant and with the new conveyors going everything is on the move.

From San Mateo comes the news, from reliable sources, that the United Railroads plan in the near future the extension of their tracks from San Mateo down the peninsula to Palo Alto, to connect with the Peninsula Railroad here. It is believed that the Southern Pacific is backing the movement and may give the United States the use of its franchise.—San Jose News.
